| <b>Title</b>                                                                                                                                             | <b>Authors</b>                                                                                                                                                                                                                                       |
| <b>E-Baby Book: Online Immunization Management System</b>                                                                                                | Charlston O. Amparo, Clarizza Mae M. Banting, Roi Jonh B. Tadeo, Prof. Avonn C. Nova, Prof. Marilou N. Jamis                                                                                                                                         |
| <b>Aiming for Vision 20/20: A Software-Module for Training Barangay Health Workers in Response to the Global Advocacy for Better Eye Health</b>          | Lorenzo I. Buniel, Eunice Edina B. Dichoso, Michelle I. Tizon, and Dr. Katherine M. De Mesa                                                                                                                                                          |
| <b>The Anti-Hypertriglyceridemic Activity of Polyphenolic Compound Extracted from Green Coffee Bean on High Triglyceride Diet Induced Albino Rats</b>    | Christianne Bernadette S. Bautista, Rina D. Dayao, Chicky B. Guerra, Larmina P. Samonte, and Prof. Maria Dolores C. Evangelista                                                                                                                      |
| <b>Algal Biodiversity in Tayabas Bay Intertidal Area</b>                                                                                                 | Robert Aguilar, Dana Austria, Franz Anulacion, Darianne Beltran, Kathryn Kae Carabeo, Sarah Lee Canuel, March Four Coronel, Kevin Clarck Lazaro, Shalom Mondarte, Jenny May Pilaes, Rhannie Ayn Reyes, Maria Cathleen Sy, and Prof. Nieves L. Capili |
| <b>Flexural Strength Properties of Light Cured Composite Resin and Zirconia Reinforced Glass Ionomer Dr. Belinda Mutya-Arias</b>                         | Dr. Roveric Carreon, Dr. Evelyn Caluag, Dr. Filipina Ng, Dr. Richa Marcos, Dr. Arlene Pajanostan, and Dr. Ma. Cristina Udarbet                                                                                                                       |
| <b>Acceptability of a Training Package on Work Related Body Mechanics</b>                                                                                | Prof. Melandro De Los Reyes Santos                                                                                                                                                                                                                   |
| <b>Improvised Software for Spectacle and Contact Lens Fitting Selection</b>                                                                              | Cherie G. Arevalo, Dr. Katherine M. De Mesa                                                                                                                                                                                                          |
| <b>Iron-Reducing Efficiency of Polyphenol Compounds Extracted from Allium cepa L. var tropeana (Red Onion) Bulb to Iron Overload Induced Albino Rats</b> | Kay B. Coros, Michelle Lalaine R. Domenden, Asmina M. Mangurun, Xchosa-Kay C. Repatacodo, and Dr. Ferdinand A. Mortel                                                                                                                                |
| <b>Innovative Piggyback System for Managing Keratoconic Patient: Impact on Lifestyle of a Person: A Case Report</b>                                      | Catherine Mendez, Bernardita Apilado – Garcia                                                                                                                                                                                                        |
